Personal details

Solutions Architect and **Senior Software Developer** with **16+ years of enterprise experience** across financial regulation, insurance, retail, and UAE government sectors. Currently serving as Senior Analyst Design & Development at the Central Bank of the UAE, contributing to AI-enabled enterprise systems, SupTech/RegTech initiatives, and secure integrations with multiple government entities. Skilled in gathering and documenting project requirements, managing project execution, and consistently delivering production-ready software on schedule. Proven ability to design, estimate, prototype, and implement complex systems in fast-evolving requirement environments, following Agile/Scrum methodologies and peer code review practices. Actively expanding into Generative AI, LLMs, Agentic AI, and intelligent automation, applying this to modernize legacy enterprise systems into API-driven, cloud-ready, and automation-first architectures. An effective leader and architect, skilled in aligning teams with project and organizational goals.

SKILLS:

- **Languages:** C#, VB.NET, JavaScript, HTML/CSS, SQL, TSQL, PowerShell, Bootstrap
- **Server-side Frameworks:** ASP.NET, MVC, Web API, .NET Core, REST, SOAP, Entity Framework,
- **Client-side Frameworks:** JavaScript, jQuery, AJAX, JSON, Vue.js, AngularJS, Razor, Blazor, SignalR
- **Database:** SQL Server 2005 to latest, SSIS, SSRS, SSAS
- **AI & Intelligent Systems:** Generative AI, LLMs, Agentic AI, Machine Learning, Deep Learning, NLP, RAG concepts, Prompt Engineering, AI-powered applications, AI automation
- **Cloud, DevOps & Platforms:** Microsoft Azure, Azure DevOps, AKS, Kubernetes, Docker, CI/CD, Jenkins, Appian, UiPath/RPA
- **Architecture & Integration:** Enterprise Integration Patterns, Microservices, API Gateways, Domain-Driven Design, RabbitMQ, Web Services, SSO, Government Integrations, Enterprise Messaging
- **Source Control:** TFS, SVN, Bitbucket, Azure DevOps
- **Software Tools:** Visual Studio 2008 to latest, MS SQL, Crystal Reports, DevExpress, Swagger, Power BI, ReSharper
- **Other Integrations:** PayPal, e-Dirham, UAE Pass, Windows Services
- **Project Management:** Agile/Scrum methodology, technical leadership, stakeholder management, mentoring

PROFESSIONAL EXPERIENCE:

Senior Analyst – Design & Development | **Central Bank of the UAE** **Dec 2019 to Present**

- Design, develop, and enhance mission-critical enterprise systems, aligning technology decisions with security, reliability, and regulatory expectations.
- Contribute to the architecture and delivery of AI-enabled enterprise solutions, including integration of Generative AI and LLM-based capabilities, to drive operational efficiency and decision support.
- Contribute to SupTech and RegTech initiatives covering regulatory monitoring, reporting, and compliance automation.
- Design and support secure, real-time integrations with multiple UAE government entities across heterogeneous platforms.
- Modernize legacy solutions toward API-driven, cloud-ready, service-oriented architectures using microservices, REST APIs, messaging, and API gateways.
- Work across the full SDLC — requirements engineering, solution architecture, development, integration, testing, deployment, and production support applying Agile/Scrum and CI/CD practices, with daily deployments managed through Azure DevOps.

| Abu Dhabi Insurance Authority

➤ Working as Scrum Master and Team Lead in Abu Dhabi Insurance Authority on developing fully role based, Dynamic workflows based, multilingual internal systems along with Mobile Applications APIs and Integrations with other government Entities. Below is brief detail of few of them.

Automated Regulatory Inspection Platform

- Automated and transformed the onsite inspection processes for the Insurance Authority's inspection department, which supervises all registered insurance companies and related insurance professions in the UAE, executing yearly, quarterly, and monthly inspection plans against a predefined scope of work.
- After inspection there will be execution plans, recommendations letter and feedback.
- This project has Dynamic workflows

Consumer Dispute Resolution & Complaint Management System

- Replaced the existing complaint system with a new solution enabling insurance consumers to submit complaints and inquiries for resolution by the Insurance Authority and insurance companies, with escalation to committees for further decisions where needed.
- Improved complaint resolution and enabled enhanced, auto-calculated KPIs for better statistics reporting.
- Built on dynamic workflows.

Enterprise Board & Governance Meeting Management System

- This project was initiated to develop an automated meetings management in the Insurance Authority. The scope of the system covers the complete lifecycle of the Board of Directors meetings as well as the internal organizational units' meetings in the IA. The system consists of following functionalities
 - Managed Board of Directors members' personal and professional information.
 - Managed meeting locations/rooms and attendees.
 - Created and managed meeting requests, agendas, and invitations.
 - Handled pre-meeting activities draft preparation, agenda, invitees, and notes.
 - Handled post-meeting actions following up on recommendations and decisions, generating the
 - MOM, and sending action plan updates to all concerned parties.
 - Built on dynamic workflows.

Insurance Licensing & Registration Management System

- This project is developed to provide following features.
 - License& Registration of new insurance companies
 - License Renewals
 - Modifications Requests
 - Services Payments & Penalties Calculations
- This project has Dynamic workflows

Sr.ASP.NET Developer / Technical Team Lead)**March 2016 to June 2017****| Evento Solutions LLC (UAE)**

- Developed CMS-based responsive internal systems for the UAE Space Agency and Sheikh Zayed Housing Programme (SZHP), a UAE government organization.
- Developed CMS-based internal/web systems for the Sharjah Chamber of Commerce and Dubai Health Authority (DHA), including mobile application APIs for DHA.
- Developed a CMS-based responsive website for the Institute of Training and Judicial Studies (ITJS), a UAE government organization.
- Developed a responsive, role-based, AJAX-driven Gym Management System (Unit27) using ASP.NET, SQL Server, JavaScript, HTML/CSS, Bootstrap, Entity Framework, and PayPal integration.

Software Developer (ASP.NET) Achievements**August 2015 to March 2016****| Sefam (pvt) Ltd. Leading Multinational Retail Industry**

- Developed a Role based Purchase, Financial and Supply chain Management System using ASP.NET 4.0, C#, Vb.net, Sql Server, Crystal Reports, DevExpress, HTML/CSS and Web APIs.
- Developed an ERP for retail industry with full supply chain processes from purchase to sale along with payroll and inventory management and integration with Retail Pro.

➤ Developed a Multi-language ERP system using ASP.NET, C#, Entity Framework, Sql Server, Telerik, HTML/CSS and Web Services.

➤ Developed Inventory Management System

Software Engineer (ASP.NET) | DPL**June 2010 to September 2014**

➤ Developed a Multi-language ERP system using ASP.NET, C#, Entity Framework, Sql Server, Telerik, HTML/CSS and Web Services.

➤ Developed Inventory Management System

EDUCATION

B.S. Telecom Engineering (2006-2010)

- National University of Computer & Emerging Sciences (FAST-NUCES), Islamabad

Extra - Curricular

- Swimming, Hiking, Travelling and Reading

Award / Honors

- **Merit Scholarship:** (OSP 2006) — Awarded by Ministry of IT, Pakistan

Certifications

- Learning Azure Kubernetes Service (AKS)
- Kubernetes Basics for DevOps
- Introduction to Azure DevOps
- Microsoft Azure Fundamentals (AZ-900)
- DevOps and Jenkins Fundamentals
- Microservices and Deployment using ASP.NET
- RPA Basics and Introduction to UiPath
- Introduction to AI — IBM
- Prompt Engineering Basics — IBM
- AI Capstone Project with Deep Learning — IBM
- Coding with Generative AI
- The Rise of Generative AI
- Building AI-Powered Chatbots Without Programming
- Generative AI for Executives & Business Leaders — Parts 1 & 2
- GenAI Fluency Curriculum
- Claude 101 — Anthropic
- FinTech and the Transformation in Financial Services — Copenhagen Business School
- Power BI for Data Science and Analytics

Personal Information

- **Nationality:** Pakistani
- **Languages:** Urdu, Punjabi (fluent), English (good), Arabic (Basic)
- **Date of Birth:** 01 January 1989
